THE COUNTY CONVENTION.

The call for the Republican County Convention has been amended by the central committee, so as to provide for the selection of delegates to the Congressional convention, and it appears in that form in to-day's paper. A moment's reflection will show the proprioty of this change. The convention to nominate a candidate for Congress will be called to meet, probably, as early as the month of July. The county concounty officers, and to select delegates to the logislative convention, will probably not be held earlier than Augustat least such has been the custom heretofore-so that if the congressional delegates are not selected at the convention now called it would become necessary to hold another convention for that purpose. Three county conventions, within as many months, would be taxing the patience of the people a the recent attack on, and vindication little too much, especially when the of, Mr. Blaine, says: "Mr. Blaine same objects can be accomplished just comes out of this trial with a reputaas well by two.

The request was granted, 48 to 13, and Blair addressed uncalled for fling at the South," the Senate in favor of the motion. He argued that it was impossible for the found in a Republican platform, since enate to do justice to so great and important matter, on account of the advanced stage of the session, and counsel had not taken time to make suita-

Again, the House was even now making investigations with a view of presenting additional articles of impeachment, and if any additional charges were to be made, counsel for accused wanted them made here. They invited the closest scrutiny into the official conduct of the accused. Another reason, why the Senate should postpone the trial was that it connected itself directly with the political issues of the day, and both parties were almost committed to political excitement against the accused and said that it was committed to his gacity, or its memory must be very ruin. The advantages of this Pump over many others are many. The Chain being button-less; it is much lighter, consequently it is much lighter, consequently it is not liable to break, and works much easier. The RUBBER BUCKETS which are attached to the Chain will: not wear the Tubing consequently it will last longer than when Metal Buttons are used. It is, positively, ANTI-FRESZING. It is a positive WATER PURIFIER, as each Bucket is const ucted with an AIR CHABBER, which extress given quantity of pure sir into the water, which immediately diffuses through the endire bed of water, purifying and cleaning and rendering it fit for use.
